

**Basilicata and Apulia: the "Sassi" and "Trulli" tour**  
An 8-day cycling tour

**Tour Code:** ITBASPUG01C

A lovely week of cycling around the two wonderful UNESCO sites of Alberobello and Matera. Leaving from Matera's "Sassi" and the rock caves and stone houses, you will reach the Itria Valley, a karstic land also called the Valley of the Trulli due to the thousands of "trulli", limestone dwellings that are remarkable examples of drywall constructions offering a prehistoric building technique, which is still in use in Apulia. All around you there is an explosion of colour, olive trees and ancient farmhouses. Back to the mysterious land of Basilicata, a slow ride from the rolling hills of the Bradano Valley, to the natural oasis of San Giuliano Lake and back to Matera. The South of Italy's natural beauty, ancient culture, deeply rooted local traditions, genuine Mediterranean food and above all the warmth and hospitality of its people, will capture you and leave you with an unforgettable feeling.

**Program day by day****Day 1 Arrival in Matera and transfer to your hotel.**

Matera has gained international fame for its ancient town, the "Sassi di Matera" (meaning stones of Matera). The Sassi originate from a prehistoric (troglodyte) settlement, and are suspected to be some of the first human settlements in Italy. The Sassi are houses dug into the tuff rock itself, which is characteristic of Basilicata and Apulia. Many of these "houses" are really only caverns, and the streets in some parts of the Sassi often are located on the rooftops of other houses.

In the afternoon: it is possible to book a guided tour around the **Sassi** – a UNESCO world heritage site since 1993 - with its small streets and squares, caves, rock churches and cellars. Two districts built from the Medieval age through to the last century. We suggest you have dinner at one of the Sassi's typical restaurants.

## **Day 2 From Matera to Alberobello**

Distribution of bicycles, briefing and departure for Alberobello. You will pass through the small villages of Gioia del Colle and Noci and on to Alberobello, the capital town of "Trulli", an UNESCO world heritage site. A Trullo is a traditional Apulian stone dwelling with a conical roof. The style of construction is specific for the Itria Valley (in Italian: Valle d'Itria), in the Murge area of the Italian region of Apulia (in Italian: Puglia). Trulli were generally constructed as dwellings or storehouses. Traditionally they were built without any cement or mortar, thus avoiding taxation. Accommodation in the historical centre in a trullo dating from 1600.

The Itria valley is filled with thousands of olive trees. You will pass through Cisternino. The architecture of Cisternino is typical of the region with an old historical centre containing white washed, stone buildings with cool, shaded, cave-like interiors, narrow streets and churches. A climb over the hill dominating the Itria Valley will bring you to Locorotondo, a real Baroque gem. Back to Alberobello and overnight stay in your trullo.
